ANIMAL FIGURINES COLLECTION

The very first figurines to be made at the Imperial Porcelain Manufactory were created in the mid-eighteenth century by Dimitry Vinogradov, the father of Russian porcelain. He fashioned a porcelain bear, and to this day figurines are still made to his original techniques – hand-made out of «soft» or «hard» porcelain. Almost all of them are painted by hand in under-glaze or over-glaze. There is a wide variety of animal figurines such as cats, dogs and horses; also exotic representations of African and Arctic wildlife.
